

JAVA

From the website <https://demoqa.com/select-menu>

1. Under "Standard multi select": get "Volvo" and "Audi" then display the same in output console
2. Under "Old Style Select Menu": get "Indigo" and display in output console

```
package seleprac;

import org.openqa.selenium.By;
import org.openqa.selenium.WebDriver;
import org.openqa.selenium.WebElement;
import org.openqa.selenium.chrome.ChromeDriver;
import org.openqa.selenium.support.ui.Select;

public class DropdownhandleAssign {
    public static void main(String[] args) {
        // Launch browser
        WebDriver driver = new ChromeDriver();
        driver.get("https://demoqa.com/select-menu");

        // --- Standard multi select ---
        WebElement multiSelect = driver.findElement(By.id("cars"));
        Select cars = new Select(multiSelect);

        // Select Volvo and Audi
        cars.selectByVisibleText("Volvo");
        cars.selectByVisibleText("Audi");

        // Print selected options
        System.out.println("Standard Multi Select:");
        for (WebElement option : cars.getAllSelectedOptions()) {
            System.out.println(option.getText());
        }

        // --- Old Style Select Menu ---
        WebElement oldStyleSelect = driver.findElement(By.id("oldSelectMenu"));
        Select colorSelect = new Select(oldStyleSelect);

        // Select Indigo
        colorSelect.selectByVisibleText("Indigo");

        // Print selected option
        System.out.println("\nOld Style Select Menu:");
        System.out.println(colorSelect.getFirstSelectedOption().getText());

        // Close browser
        driver.quit();
    }
}
```
